

**WOODMASTER ECONOMY CARBIDE-TIPPED SAW BLADES
(Alternate Top Bevel Grind)**

Our most economically priced carbide-tipped saw blade. Designed strictly for cutting wood and wood composites. The 7 1/4" blades are built with a thinner kerf producing less waste and a smooth, easy feed. Medium-smooth cuts can be expected with the 20 tooth blade while a smooth cut will result with the 40 or 60 tooth blades. These blades are suitable for use on portable hand saws, table saws or radial arm saws.
