

WOOD-MILLER CUTMASTER

Constructed with a high speed cutting edge welded to a resilient alloy back, the CUTMASTER hole saw will saw 1-3/8" deep holes in any materials that can be cut with a hacksaw blade — from wood and plastics to harder metals such as stainless steel. CUTMASTER hole saws have 6 teeth per inch, fit standard arbors and are available in 51 sizes; 9/16"-6".

WOOD-MILLER COMPLETE CUT

The COMPLETE CUT hole saws offer the same welded edge quality, construction and 1-3/8" depth as CUTMASTER hole saws, but with the added advantage of an arbor welded directly to the hole saw cap. This convenient feature eliminates errors in arbor selection, reduces downtime and saves money. The COMPLETE CUT is available in the same 51 sizes as CUTMASTER and all sizes require 1/4" pilot drill.

COMPLETE CUT EXTRA DEPTH

Add to the COMPLETE CUT'S high speed welded edge construction and built-in arbor the extra depth to saw through 1-7/8" thick materials. It will saw through 2 x 4's and doors in a single pass; an added advantage for contractors and tradesmen. The extra depth is also a necessity for many industrial applications.

COMPLETE CUT CARBIDE TIPPED

Designed for sawing holes in abrasive materials such as particle board, fiberglass and asbestos board, the COMPLETE CUT Carbide Tipped offers three teeth per inch, carbide tipped to resist abrasion. It also features the built-in arbor and 1-7/8" depth. Carbide is not recommended for ferrous metals but will outlast high speed steel hole saws in applicable jobs.

ARBORS COMPLETE WITH PILOT DRILLS

**UNIVERSAL
HOLE SAW ARBOR
FOR 1/2" DRILLS
#M44K**

1 ARBOR FITS ALL HOLE SAWS
PLUS BLACK & DECKER

Catalog Number	Shank Size	Thread Size	Drill Size & Type	Drill Number	Chuck Size	Arbor Extension	Fits Saws	Follow Through
M24K	1/4 Round	1/2-20	1/4 High Speed	MPD4	1/4	—	A9-A244	A12-A244
