

# RIFFLERS

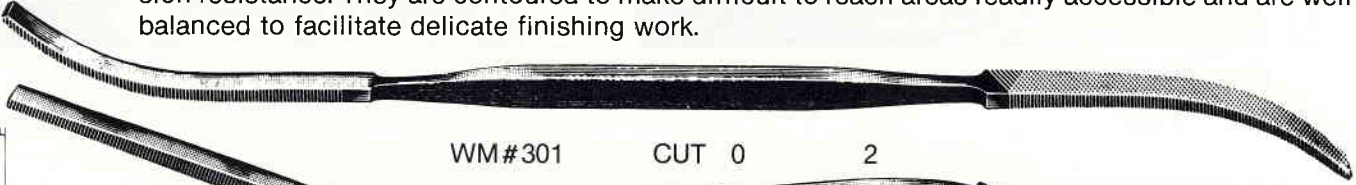

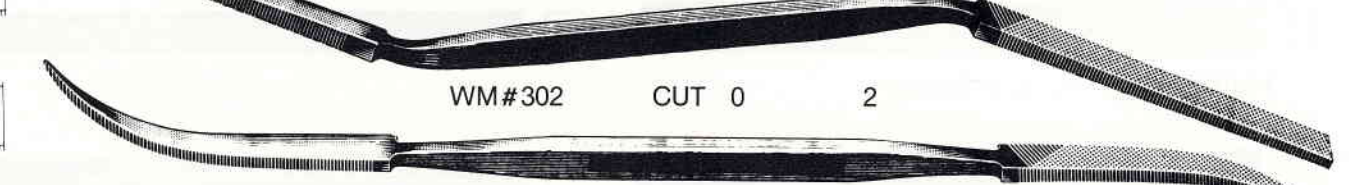

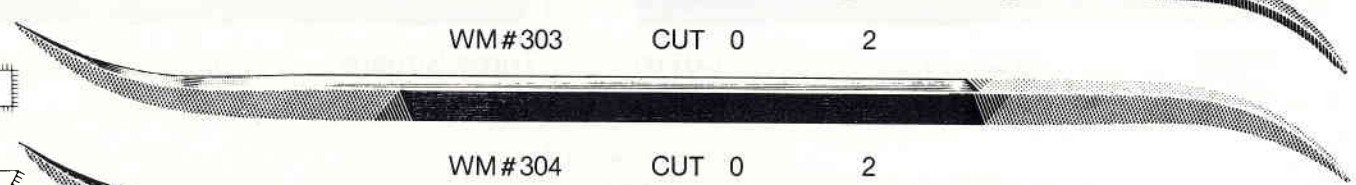

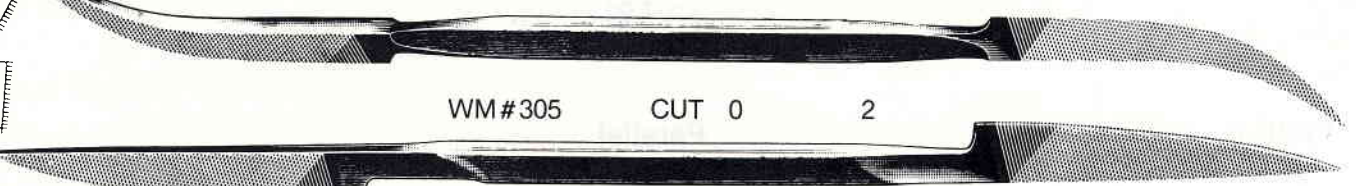

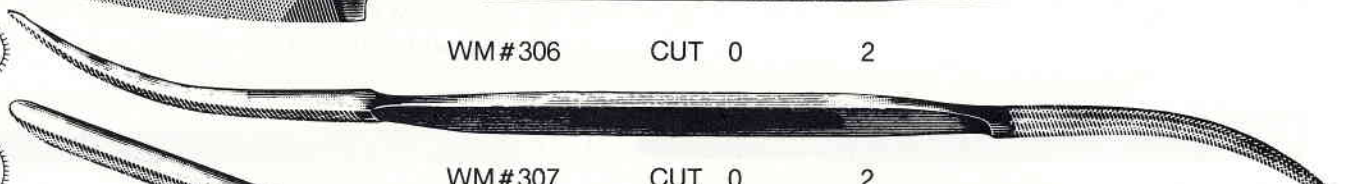

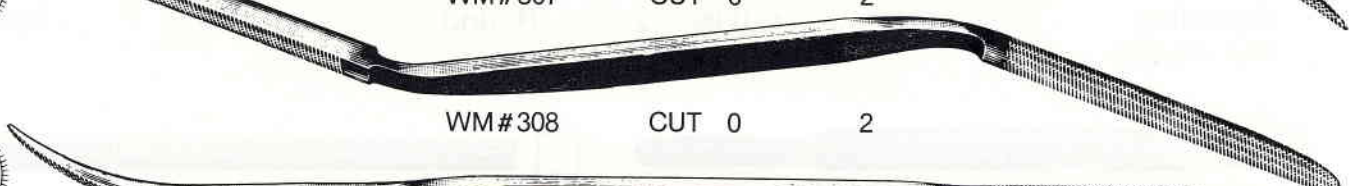

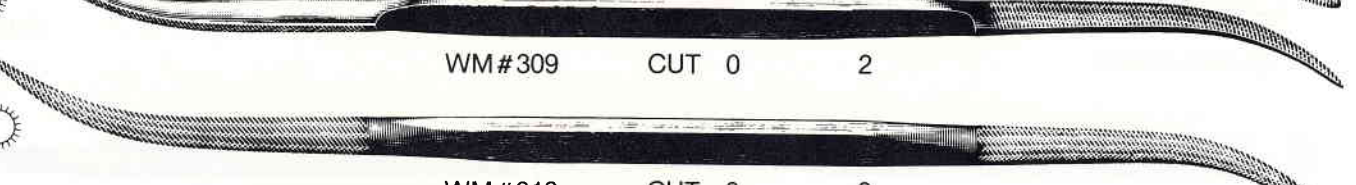

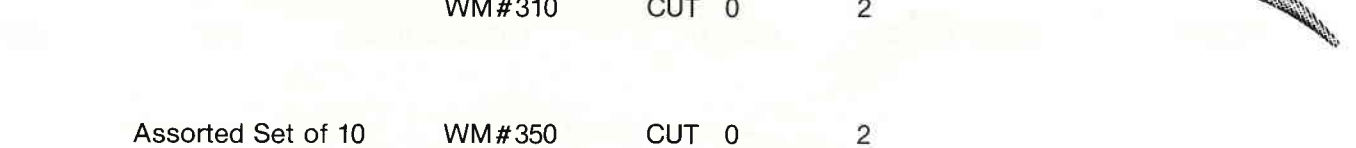

## Tool Makers'

Overall Length: 12"

(Please Note: Any shape or cut not illustrated can be supplied)

This group of 12" tool makers' rifflers rounds out the most complete line of Swiss precision rifflers available to industry anywhere. They are made of chrome-alloy steel for long, efficient life and corrosion resistance. They are contoured to make difficult-to-reach areas readily accessible and are well balanced to facilitate delicate finishing work.
